# Pavilion H

Experience the ultimate in outdoor living with the Outdoor Pavilion H - the fully configurable pergola that's taking the market by storm. With a range of new components that are sure to impress, including a new bioclimatic roof with cutting-edge technology and a sleek, redesigned shape, a waterproof aluminum roof, a polycarbonate roof, new canopies with slats, stylish louvers, new aluwood carpentry, and a glazed side, this pavilion is the perfect way to create a customized outdoor oasis that's uniquely yours. But that's not all - the Outdoor H Pavilion is now smart home compatible, which means you can control everything from the lights to the fan with the Kode

app. And with the ability to configure your pavilion to your exact specifications, you can create the perfect outdoor space for relaxing, entertaining, or anything in between.

Whether you're looking to create an intimate outdoor retreat or a spacious entertainment area, the Outdoor H Pavilion has everything you need to make your vision a reality. So why wait? Upgrade your outdoor living space today with the ultimate in customizable outdoor living - the Outdoor H Pavilion.

# New Bioclimatic ceiling

New bioclimatic roof system for H Pavilions that boasts a quieter operation and sleek new design. The roof features adjustable blades for optimal ventilation and light control, as well as an automatic rain sensor. The hidden motor not only enhances the overall aesthetic of the pavilion, but also reduces noise pollution for

a more tranquil outdoor living experience. This new bioclimatic roof system is a modern addition to Kettal's line of outdoor furniture, offering a minimalist look and functional benefits to users who seek a cleaner and more sophisticated outdoor living space.

A bioclimatic roof uses natural elements to regulate temperature and energy efficiency. A silent and clean design reduces noise pollution and provides a modern aesthetic appeal. An eco-conscious choice for sustainable living.

# New Aluminium ceiling

The new watertight aluminum fixed roof for H pavilions in a wood-like finish is a stunning addition to any outdoor venue. Made from high-quality aluminum, this roof provides superior protection against water damage and weather elements, while its wood-like finish adds a touch of natural beauty.

The wood-like finish of the roof is achieved through a unique painting process that simulates the appearance of wood. This finish adds a warm and rustic feel to the pavilion, making it a perfect fit for outdoor events in natural settings.

Installation is quick and easy, with minimal disruption to the event schedule. The roof can be installed in a matter

of days, providing immediate protection from heavy rains and other extreme weather conditions.

In addition to its practicality and aesthetic appeal, the aluminum fixed roof is also environmentally friendly. The use of aluminum reduces the need for natural resources and the roof can be recycled at the end of its lifespan.

Overall, the new watertight aluminum fixed roof in a wood-like finish for H pavilions is an excellent investment for event venues looking to enhance the protection and beauty of their space while also prioritizing sustainability.

New aluminium Glaze Wall and ceiling

# Polycarbonate ceiling

The Pavilion H has just been equipped with an exceptional new feature - a watertight polycarbonate roof that boasts a unique curved design to ensure effective drainage through the columns. This new addition not only serves a practical purpose, but it is also visually stunning, allowing natural light to penetrate the space below.

The transparent material used in the construction of this roof allows for a seamless integration with the surrounding environment, adding to the Pavilion H's already impressive aesthetic. Guests can now enjoy uninterrupted views of the sky above, while remaining comfortably sheltered from the elements.

The innovative design of this roof also provides an extra layer of insulation, making the Pavilion H more energy-efficient and sustainable than ever before. Whether it's a sunny summer day or a rainy winter afternoon, this new feature ensures that guests can continue to enjoy the Pavilion H's offerings no matter the weather.

In short, the Pavilion H's new watertight polycarbonate roof with a unique curved design is a game changer, allowing for maximum functionality, aesthetics, and sustainability. It is an exciting addition to the Pavilion H, sure to leave a lasting impression on all who visit.

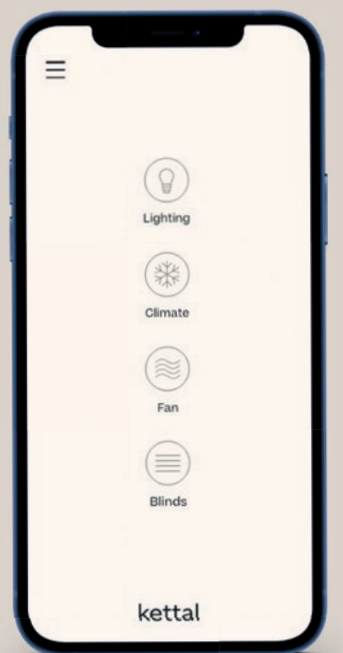

# Kode

Kode turns your pavilion into a smart home that you can control from miles away or from your sofa: Adjust the ceiling opening, control the lights, temperature and ventilation, and you can even open and close the blinds. Pavilion H is now a connected smart Pavilion.

Kode app was designed with the goal of bringing mobility and intelligence into one parallel action. With it, Kettal's Pavilion H users can now control and master the various functionalities at various distances from their Pavilion H via their cell phones. Inspired by the rationalism of German industrial designer Dieter Rams, Kode is a minimalist home automation app. Its discrete concept in analogy to a remote control, is designed with slim and elegant action elements, with functionalities basic to the proper use of the Pavilion and other elements. Kode app is a new Kettal app, uniting technology, architecture and design in one.

# Eolias, by Antonio Citterio

Eolias Collection by Antonio Citterio, inspired by the breathtaking archipelago located off the coast of Sicily. This versatile collection includes a range of indoor and outdoor furniture pieces designed to elevate any space.

One of the collection's highlights is the Eolias Salinas series, which features a chair, club chair, and club lounge chair made from sturdy aluminum with a woven wicker detail. These pieces come in both indoor and outdoor versions, with the indoor chairs available with or without wheels for added convenience.

# Plumon, by Patricia Urquiola

Inspired by the concept of dressing and undressing furniture, this collection features elegant and versatile pieces that add sophistication to any living space.

Our stackable teak chair with two cushion options offers both comfort and versatility, perfect for outdoor settings. The new Club armchair, a stylish and versatile chair, the perfect blend of form and function, adding sophistication to any space.

The ceramic side table with Glaze finish adds a unique touch to your living space, available in a range of colors

to suit any style. Meanwhile, the central ceramic table is a true statement piece, also available in Glaze colors, with a striking design and eye-catching finish.

Each piece in the Plumon collection embodies the perfect fusion of form and function, with exquisite attention to detail and premium materials. Whether you're looking to create a stylish outdoor oasis or elevate your indoor living space, the Plumon collection has something for everyone.

# Grand Bitta, by Rodolfo Dordoni

The Grand Bitta collection features a unique combination of aluminum and teak legs, seats made of braided polyester, and comfortable cushions, with teak or stone table tops, all crafted from waterproof materials.

The designer's intention was to create a dense braiding that would allow air to flow through, evocative of the braiding used to moor boats (hence the name "Bitta," which means "mooring" in Italian). The result is a collection of pieces that appear light and airy, while

also providing cozy, natural-hued nests to unwind in. Crafted from a blend of ropes, teak, and aluminum, the Daybed is fully customizable with a range of rope and fabric colors to suit your style. Designed with outdoor lounging in mind, the Daybed's generous size and comfortable design make it the perfect addition to any patio or poolside. Enjoy luxurious relaxation in style with the Grand Bitta Daybed.

# Giro, by Vincent Van Duysen

The core idea and insight behind Giro was a different usage of the rope. It is sewn together in order to create the shape of the product itself. A big source of inspiration was the Orkney Chair. This classic inspired Vincent to draw inspiration from the past with an eye on today and Kettal's technological expertise. Originally based on a natural rope material, it has been reinterpreted through the use of the very sustainable polyprollante material which can face all kinds of weather.

# Tou, by Naoto Fukasawa

Tou is our modest tribute to the ancient handicraft of rattan and reed wickerwork, an essential element in the development of both Western and Eastern cultures. Historically, it has been used for all kinds of domestic utensils, furniture and more. The materials are simple and completely natural, but the internal structure of the stem consists of hundreds of cavities, making it both strong and light.

The manufacture combines traditional manual techniques with much more industrial processes. Instead of using the most common form of weaving, we use striped vertical lines, which are lighter and much more expressive than mesh. The outline is smooth and soft, following the natural shapes provided by the material.

# Il Colonnato, by Mario Bellini

In this project, Mario Bellini took his inspiration from a basic elemental structure in architecture. His design emulated the colonnade of classical architecture, in which a sequence of columns supports a portico, in this case a table top. The base is a visually closed volume, despite being materially open. When seen from a different viewpoint, perception changes completely, as the columns no longer overlap and the space appears empty.

# Pad, by Kettal studio

Kettal has made deck chairs for decades, and always of the same excellent quality. This enables us to offer a product that garners all that experience: comfort, durability, stackability and so on. Pad is a sturdy, long-lasting deck chair system designed for relaxing in comfort. It is built to withstand continued

use. The sturdy seat guys and backrest can be easily changed. The ample seat surface and sandwich-style structure make it exceptionally comfortable. With a stretch guy attached to the aluminium frame and optional cushions that add extra comfort.

Deckchair

KSA700100

# Superfan by Michael Anastassiades

Superfan is a tri-blade fan whose geometry is simply defined through three angled blades, meeting at the rotating axis. All design decisions are made to maximise performance and improve efficiency: the angle of the blades, the lightness of the aluminium material and the selection of the motor for accurate

speed control and quiet function.

The two fan versions operate with equal efficiency both with and without a pendant, offering flexibility of use for different ceiling heights.

## App & Remote Control

Kode app allows you to remotely control and configure the Superfan, making it easy to use it from your smartphone anywhere in your home.

# Base Kitchen by Kettal Studio

This modular kitchen structure offers infinite solutions. An aluminium supporting frame can be teamed with a number of stoneware modules in various combinations whilst maintaining its authentic linear design. This design features clean, smooth surfaces, with no corners, for easy cleaning and maintenance.

It is available in two types of stoneware and two Iroko wood finishes for the doors. The modular aluminium structure comes in black only. Along with basic kitchen functions, it has a gas barbecue and can include several burners with a support for a wok. It can also include a bar.

# Sustainability: Building a greener tomorrow.

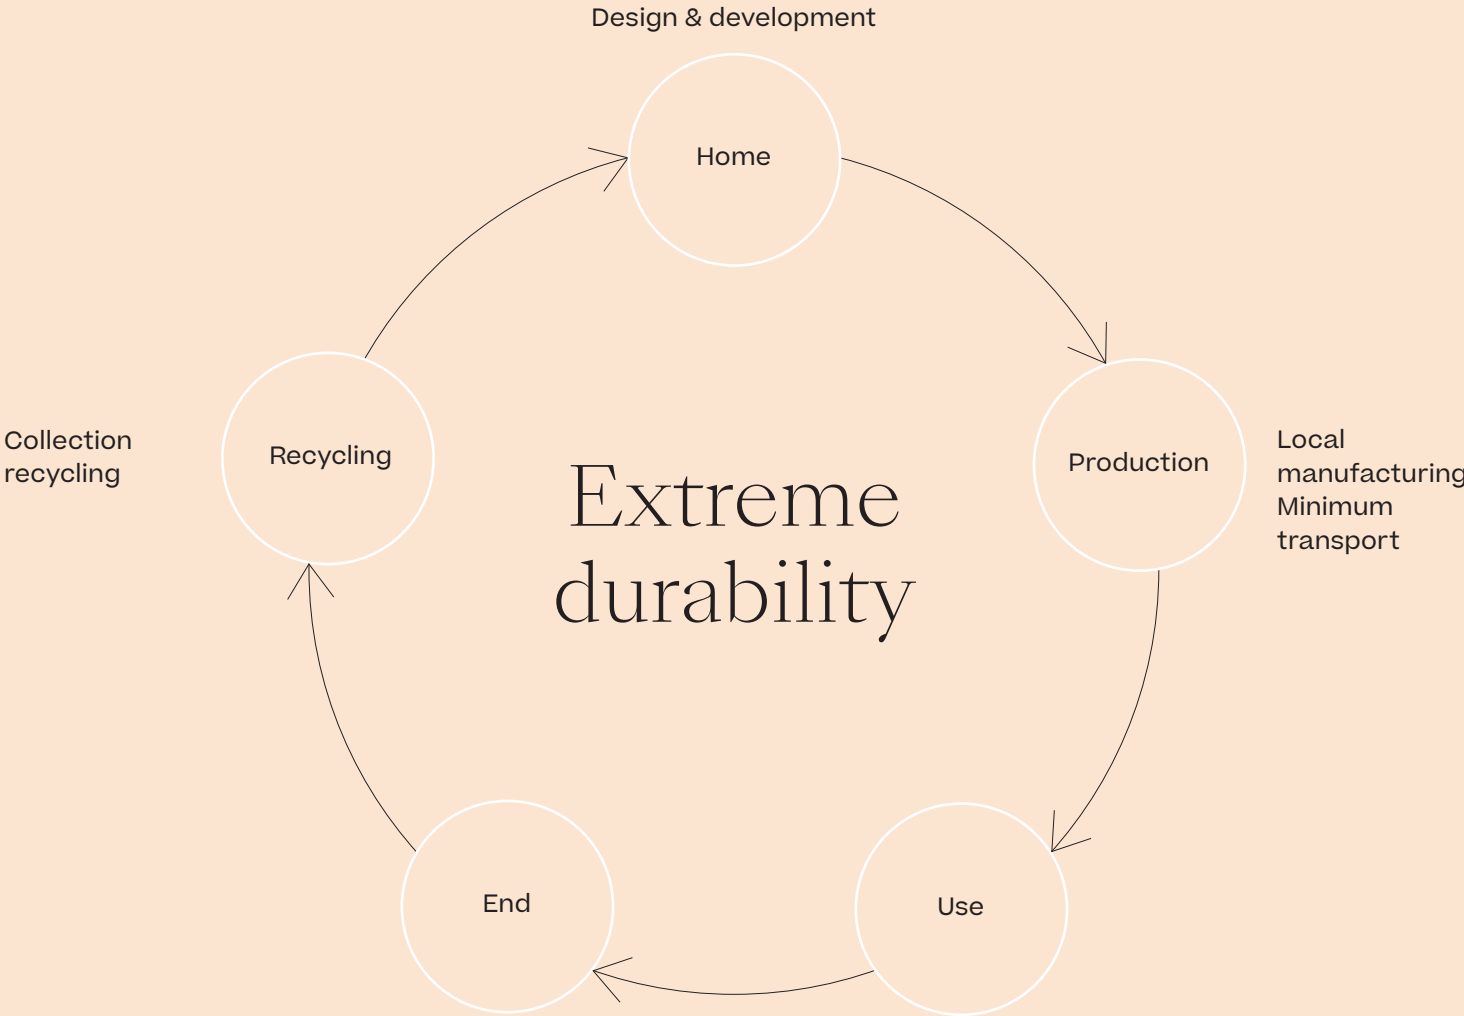

At Kettal, we are committed to more than just creating exquisite outdoor furniture and designs. We are dedicated to shaping a sustainable future where beauty and nature coexist harmoniously. Our journey towards sustainability is rooted in a deep respect for the environment and a passion for innovation.

In an era where the preservation of our planet is of utmost importance, Kettal is taking meaningful steps towards reducing our carbon footprint, conserving natural resources, and minimizing waste. Our sustainable practices extend from the selection of eco-

friendly materials to energy-efficient manufacturing processes, all while maintaining our unwavering commitment to craftsmanship and design excellence.

Join us in exploring the world of Kettal Sustainability, where style meets eco-consciousness. Discover how we blend creativity with responsibility, striving to inspire a lifestyle that not only enhances outdoor spaces but also safeguards the planet for generations to come. Together, we can forge a greener tomorrow, one design at a time.

We monitor the life cycle  
of our products.

Environmental aspects

Nearly 100% of paint used is recyclable and eco-friendly.

The most significant environmental aspects in the furniture sector are related to the consumption of raw materials, specifically fuel, paint and wood used in furniture manufacturing. With this in mind, we implement continuous measures to minimise any negative impacts on the environment. For example, Kettal carries out product research to improve processes and assess the possible external impact of its products.

True to its philosophy of respect for the environment, Kettal ensures that its main materials, such as paint and wood, are both high-quality and environmentally sustainable. As a result, almost 100% of the paint it uses is recyclable and environmentally friendly. Its main supplier of paint used in the manufacture of furniture has both quality certifications (Qualicoat, GSB, IKS, Quali Steel Coat) and environmental certifications for its products (verified by AENOR in accordance with its Global EPD type III ecolabel system, ISO standards, etc.).

As regards wood, Kettal uses teak certified by the agency SUCOFINDO, which guarantees environmental requirements, commitment to quality, occupational health and safety and social responsibility. Likewise, following its commitment to offer the best design and the highest product quality, for each new design it draws up an Environmental Product Declaration (EPD) for the purpose of assessing the

environmental impacts. The study for the EPD produces quantitative information on the product’s environmental performance through all stages of its life cycle. This information is relevant when identifying sources of environmental impact, prioritising, making decisions focused on minimising the environmental impacts of similar or future products, implementing eco-design strategies and providing consumers with environmental product information.

Given the characteristics of the sectors in which Kettal operates, it does not use any materials or production processes that directly release greenhouse gases (GHGs) or other substances with a serious environmental impact.

Products

Our products are local manufactured and 85% handmade.

The human factor is crucial as manual processes take priority over mechanical ones. This allows using techniques that would not be possible in a standard production line process and meticulous control over the quality.

Kettal has analyzed the variants of product life cycle to minimize environmental impact as far as possible. Not only in our raw material usage, but also other variables such as CO2 emissions from transport or use and durability. Under this premise, the raw materials are recyclable and/or recycled, and the objective is to produce all components close to the production site. For example, the essential raw material used at Kettal, such as fabric, rope, and aluminium, are produced within a radius of 100km. Also, each design is aesthetically designed and technically developed to last as long as possible, that is why Kettal keeps technical drawings and product patterns that are 30 years old in order to be able to replace components and extend the life of the product.

Our mission is to create furniture that is timeless and contemporary, combining creativity, personality, innovation, and modern production methods. We praise the simplicity and beauty of everyday life, the excellence in our production and customer service. We believe in sustainable growth through building lasting relationships and products.

When it comes to our products, sustainability is at the core of our design and manufacturing processes. We carefully select materials that are ethically sourced and environmentally friendly, ensuring they meet our high standards for quality and durability. We embrace innovative technologies and techniques that reduce waste, energy consumption, and carbon footprint throughout the production cycle.

Additionally, our commitment to sustainability extends to our supply chain. We work closely with our suppliers to ensure they adhere to responsible and sustainable practices. By promoting fair labor conditions, minimizing environmental pollution, and supporting local communities, we strive to create a positive impact beyond our own operations in Bellvei, a small coastal village 45km from Barcelona.

# Materials

Materials are an important part of caring for the environment and a key factor in the product life cycle. All materials are recyclable and recycled as much as possible, as long as they have the characteristics to ensure durability. The better the quality, the longer the product life cycle. And a longer life cycle means it is more environmentally friendly, as fewer manufacturing processes will have to be put in place, reducing the carbon footprint and generating less waste.

Our raw materials are not only recyclable, but recycled. We study the impact of the material recovery process and the durability of the material over time. The essential raw materials are produced locally, within a radius of 100km. We have analysed each product life cycle to minimize environmental impact as far as possible. Not only raw materials, but other variables such as CO<sup>2</sup> emissions from transport or use and durability.

# Key values

## We do not build in obsolescence.

### Fluorocarbon-free Fabrics

Creation of Terrain Fabrics, first fabric finished with a fluorocarbon-free compound, which is the ideal way to achieve wearing comfort and protect the material in an environmentally friendly way. Since then, all our fabrics are fuorocarbon-free.

### FSC Wood

All wood used in our furniture is FSC certified, ensuring its sustainable origin and responsible management. The wood used in our furniture has been sourced from well-managed forests, supporting the conservation of natural habitats and the livelihoods of local communities.

### Goal: Zero emissions

At Kettal, our goal is to achieve zero emissions by 2036. We are committed to minimizing our environmental impact and actively working towards a sustainable future. Through innovative practices, energy-efficient technologies, and responsible manufacturing processes, we aim to eliminate greenhouse gas emissions from our operations entirely. We understand the urgency of addressing climate change, and reaching this ambitious target is an essential step in creating a better world for future generations.

### Pavilions

Our Pavilions are made with 85% Recycled materials.

### Carbon footprint

Since the past year, we have been analyzing the carbon footprint of each of our products. In our commitment to sustainability, we believe it is essential to understand and reduce the environmental impact of our manufacturing processes. By examining the carbon footprint, we aim to identify areas where improvements can be made, such as optimizing energy consumption, reducing emissions, and implementing eco-friendly materials. This ongoing analysis allows us to make informed decisions and work towards creating more environmentally-conscious products for our customers.

### Environmental-certified materials

Our materials are backed by environmental certifications. These certifications ensure that the materials we use in our products have been sourced and processed in an eco-friendly and sustainable manner. We are committed to upholding these environmental standards and continuously seeking ways to minimize our ecological footprint.

### CFC-free polyurethane

The polyurethane we use is CFC-free. CFC stands for chlorofluorocarbon, which is a harmful substance known for its ozone-depleting properties. By opting for CFC-free polyurethane, we ensure that our products contribute to a healthier planet by reducing the release of harmful substances into the atmosphere. We believe in creating sustainable and responsible designs, and this commitment extends to the materials we choose.

### Paint almost 100% recyclable

Almost 100% of the paint we use is recyclable and environmentally friendly. The main supplier of paint used in the manufacture of furniture has both quality certifications (Qualicoat, GSB, IKS, Quali Steel Coat) and environmental certifications for its products (verified by AENOR in accordance with its Global EPD type III ecolabel system, ISO standards, etc.).

# We care about our employee's security and wellbeing.

- Strict Workplace Security and Protection norms and continuous Workplace Risk Assessment and Training.
- Internal career promotion enhancement giving priority to fill an open role with an existing employee instead of hiring someone new.
- Improve work-life balance with flexible work hour schedules.

# We promote diversity and inclusion within our employees.

- Advocate for the people to maintain pay equality.
- Equal pay policy between genders implementing fair scheduling practices.
- Recruitment policy does promote gender equality and multi-cultural inclusion.
- Application of Spanish Family leave and childcare policies.
- Acknowledgement of holidays for all cultures.
- Promotion of team working across the organization.

Waranty terms

For domestic use, all products, except for cushions, covers and fabrics (including textiles), are guaranteed for a period of five years against any manufacturing defect that affects their suitability for use. This applies to normal conditions of use and maintenance. This guarantee does not apply to faults or imperfections resulting from the passage of time or normal wear and tear. Circumstances not covered by this guarantee include, but are not limited to, the fading or change in shade of colours, changes in wood texture, scratches resulting from use, etc. For non-domestic use, by the hotel and catering industry and collectives for example, all products, except cushions, covers and fabrics, are guaranteed for a period of two years. This guarantee is subject to the same conditions as outlined above.

Technical specifications

Committed to innovation and quality, Kettal's collections are manufactured to the strictest quality standards, from the selection of the materials, to the quality and safety testing of the furniture.

IMO Certification

Upon request, we can certify our products under the IMO standards.
